EXPERIENCE

Technical Support Engineer Jun 2022-Jun 2024
Finfolab *Bangalore*

- Experienced in customer success management and stakeholder engagement, ensuring seamless collaboration and strategic value delivery.
- As a technical support engineer with 2 years of experience in resolving client queries over chat and phone, I am driven by curiosity to continuously learn and grow.
- Proficient in root cause analysis (RCA) to effectively resolve client and internal tickets.
- Delivered 24/7 technical support, including product installation, configuration, and troubleshooting using tools like AnyDesk and TeamViewer.
- Created and maintained FAQs, troubleshooting guides, and conducted user training sessions to enhance the customer experience.
- Collected user feedback for product improvements and escalated complex issues to higher-level support or development teams.

Data Analyst Intern Aug 2024-Sept 2024
Unified Mentor Pvt. Ltd *Bangalore*

- Gained hands-on experience in data analysis, using analytical tools to extract insights from complex datasets.
- Completed three company-level projects: Atliq Hospitality Analysis, Amazon Sales Analysis, and Heart Disease Diagnostic Analysis.
- Developed strong skills in data cleaning, manipulation, and visualization using SQL, Python, and Excel.
- Effectively communicated insights to stakeholders and collaborated in team environments.
- Proficient in Power BI, SQL, Python, Tableau, and statistical data analysis for modeling and visualization. .

- Conducted data analysis and created interactive dashboards to visualize insights.
- Explored gender-based investment trends and savings objectives.
- Described investment durations, monitoring frequencies, and behavioral motivations.
- Highlighted key insights into investor preferences and information sources.
- Consolidated findings into a comprehensive Power BI dashboard.
- Demonstrated the ability to optimize marketing strategies, improve sales performance, and enhance predictive modeling

PROJECTS

Pizza Sales Analytics: SQL-Driven Insights for Restaurant Performance Optimization

I analyzed pizza sales data, identifying top-selling pizzas, busiest hours, and sales trends, leading to insights that supported strategic restaurant management

Coffee Shop Sales Analyzer: Excel-Driven Insights for Strategic Business Optimization

I developed an interactive Excel dashboard to analyze coffee shop sales, identifying key trends in sales, peak hours, top products, and providing recommendations for staffing, marketing, and inventory optimization.

Cricket Dream Team Analyzer: Data-Driven T20 Squad Selection using Advanced Analytics

I developed an end-to-end cricket data analytics project, scraping data, pre processing it with Python, and creating an interactive Power BI dashboard to analyze player performance and select the "BEST 11" team.

Netflix Content Analysis: Interactive Tableau Dashboard

I developed a comprehensive Tableau dashboard to analyze Netflix's content library, featuring interactive genre based lists, yearly trends, and top genre visualizations using a Kaggle dataset.
